Saskatchewan Environmental Directory

A Guide to Who's Who in the Saskatchewan Environmental Community

The Saskatchewan Environmental Directory is a comprehensive list of non-government organizations, government and private agencies and offices which offer services or are involved in activities that pertain to the environment.

The Saskatchewan Environmental Directory provides the user with the organization name, address, contact name, telephone/fax number and an organizational profile where applicable. The directory is updated on a continuing basis.

A listing in this directory does not imply recommendation or endorsement by Saskatchewan Environment and Resource Management. We reserve the right to include or delete listings, and to edit information provided by an organization.

This document and update form are available on our Internet Website at www.gov.sk.ca/govt/environ/

Note: Organizations and their descriptions were gathered from a variety of sources. If your organization is not listed and you would like it to be, fill out the Update Form at the back of this application and send it to:

SaskEnergy

1945 Hamilton Street
Regina, SK S4P 2C7

SaskEnergy Incorporated has, over the last few years, adapted a number of its vehicles to operate on natural gas, the cleanest burning of fossil fuels. Based on the positive operating experience of these vehicles, SaskEnergy plans to initiate a Natural Gas Vehicle Program to make natural gas available as an alternative vehicle fuel for Saskatchewan businesses and other consumers. Conversion to cleaner burning fuels will ultimately result in less urban air pollution and improved regional and global air quality.

Shand Greenhouse
Box 280
Estevan, SK S4A 2A3

The Shand Greenhouse, a subsidiary of SaskPower, uses waste heat from energy generation to produce thousands of native tree and shrub seedlings every year. Shand seedlings are distributed free-of-charge to organizations for conservation projects, to enhance wildlife habitat and for land reclamation. The waste heat, in the form of hot water, warms the greenhouse during winter months. The greenhouse also conducts native vegetation research.
